

## **Important Technical Notification**

# **Windows Vista 64 Bit Computer Operating System Not Compatible with many Campus Applications**

***September 8, 2008***

If you are considering the purchase of a new computer for use with any campus applications including the School of Nursing's Distance Learning applications.

Please note that some new computers are currently being sold with what is referred to as the "Windows Vista **64** bit operating system".

This version of Windows Vista is currently not compatible with many campus applications including the School of Nursing's Distance Learning applications.

When purchasing a new computer please be careful that you are purchasing a **32** bit version of the operating system not a **64** bit version.

**If you have any questions about this please contact  
Ken MacDowell at 631-444-3277**
